

INSTALLING THE LOUPEDECK PLUGIN FOR PHOTOSHOP

1. Update Photoshop to version 22.0 via the [Adobe Creative Cloud](#).
2. Download the Loupedeck software from our [website](#) and run the installer.
3. If you see a pop-up window during the installation process asking how you want to install the Photoshop plugin, choose **Install from Adobe**
4. Launch Photoshop 22.0 after the installation has been completed.
5. In the top menu, select **Plugins -> Loupedeck -> Loupedeck info**.
You should see the Loupedeck plugin connected:

If Photoshop was not automatically detected during the installation, the plugin might not be listed in Photoshop as pictured. In that case, please install the plugin from the Adobe Creative Cloud Marketplace:

1. Open the **Adobe Creative Cloud** application.
2. At the top menu bar, select the tab **Marketplace**.
3. In the left column, select **All plugins** and then search for **Loupedeck** in the search bar.
4. Once you see the Loupedeck Photoshop plugin, click on **Get**.
5. Loupedeck Photoshop plugin installation will be confirmed with a notification:

6. Now, follow step 4 & 5 from above.
